2022

Management reserves all rights. Drinking alcoholic beverages during pregnancy may negatively impact the health of your unborn child. The Washoe County Health Department advises that eating raw, undercooked animal foods or animal foods that are not otherwise processed to eliminate pathogens such as meat, poultry, eggs, milk, seafood or shellfish pose a significant risk to everyone, especially the elderly, young children under the age of four years, pregnant women, and other susceptible individuals with compromised immune systems. Thorough cooking or processing of foods to eliminate pathogens reduces the risk of illness.
